

This letter is response to the Low Power (lpfm) broadcast service and its possible affect on the radio station K-LOVE. The town of Montrose is a small community, appx. 30 thousand, and has been richly blessed by K-LOVE as it shares the gospel of Jesus Christ to all who happen to tune in the station. I have seen its positive influence in our church as members hear new music and desire to sing those songs along side 100 year old favorites. K-LOVE is an excellent witnessing tool, as I am able to tune it in at work and coworkers hear the good news of Christ. There are no other radio stations like K-LOVE in our area, and if removed, the loss would be felt by many. I believe it is in the best interest of the public to maintain K-LOVE in all areas, not just Montrose, Colorado, because the programing on K-LOVE enables people to "hide Gods word in their heart" (Ps. 119:11) through the stations commitment to the Bible.

Thank you, Carter Trask
